Matching and Weighting
```

YouGov interviewed 856 respondents who were then matched down to a sample of 600 to produce the final dataset. The respondents were matched on gender, age, race, education, party identification, ideology, and political interest. YouGov then weighted the matched set of survey respondents to known marginals for the general population and citizens of the United States from the 2007 American Community Survey. Those marginals are shown below.
